Root

Burnout Prevention, Rooted in You

A calming, gamified mobile app that detects burnout signals and helps you recover, before it's too late.

Flutter · GPS Intelligence · Wellness Gamification

- Students
- Professionals
- Athletes

By – Khushi Sharma, Daniel Park, Augusto Segura

The Burnout Crisis

Why this problem demands a solution now

77%

of workers have experienced burnout

63%

say burnout affects their job performance

2.5×

more likely to leave their job

50%

rise in student burnout since 2020

Most burnout tools are reactive, they help after the crisis. Root intervenes before it happens.

Meet Root

One app. Three intelligent layers.

Detect

GPS or manual check-in senses your environment, work, school, park, home, and adapts in real time.

Adapt

The entire UI theme, notification tone, and break type shift to match where you are and what you need.

Recover

Guided meditation, water reminders, break nudges, and a growing gamified garden keep you on track.

Adaptive Location Themes

Tap your location, the entire app transforms

Work

Monotone · Focused · Minimal

School

Sunlight · Sky Blue · Energized

Park

Deep Green · Golden · Airy

Home

Terracotta · Cozy · Warm

Gym

Teal · Slate · Energized

GPS auto-detects location · Manual check-in always available · Liquid glass nav bar with leaf home button

Stay Hydrated. Stay Grounded.

Interactive Water Glass

- Animated glass pours water on each tap
- Customizable daily goal (cups or ml)
- Soft pour sound & satisfying fill animation
- Progress shown as glass level fills up
- Streak counter for daily goal achieved
- +10 pts earned per cup logged

Your Growing Garden

- Points for daily check-ins & streaks
- Points for water logging
- Points for completing break suggestions
- Points for meditation sessions
- Garden grows: Seed → Sapling → Tree
- No leaderboards, personal growth only

Meditation Mode

Press go. The world fades away.

Set Your Duration

Smooth 1–60 min dial before you begin

Rain Ambience

Gentle rain sounds play the moment you press Go

Breathing Guide

Expanding circle coaches your breath in and out

Rain Droplet UI

Soft animated drops fall across the immersive screen

Full Takeover

No nav bar, no distractions, tap anywhere to exit

Gentle End Chime

Soft bell fades the UI back to your location theme

Personalized for Your Health

Root adapts its care to your individual wellness profile

Student

Class schedules, study-break timing, exam stress detection

Professional

9–5 patterns, meeting load awareness, overtime alerts

Athlete

Recovery nudges, movement prompts, performance balance

Optional Health Conditions, for smarter nudges:

Diabetes
Blood sugar reminders, hydration alerts, post-meal movement

High Blood Pressure
Breathing exercises prioritized, stress-reduction focus

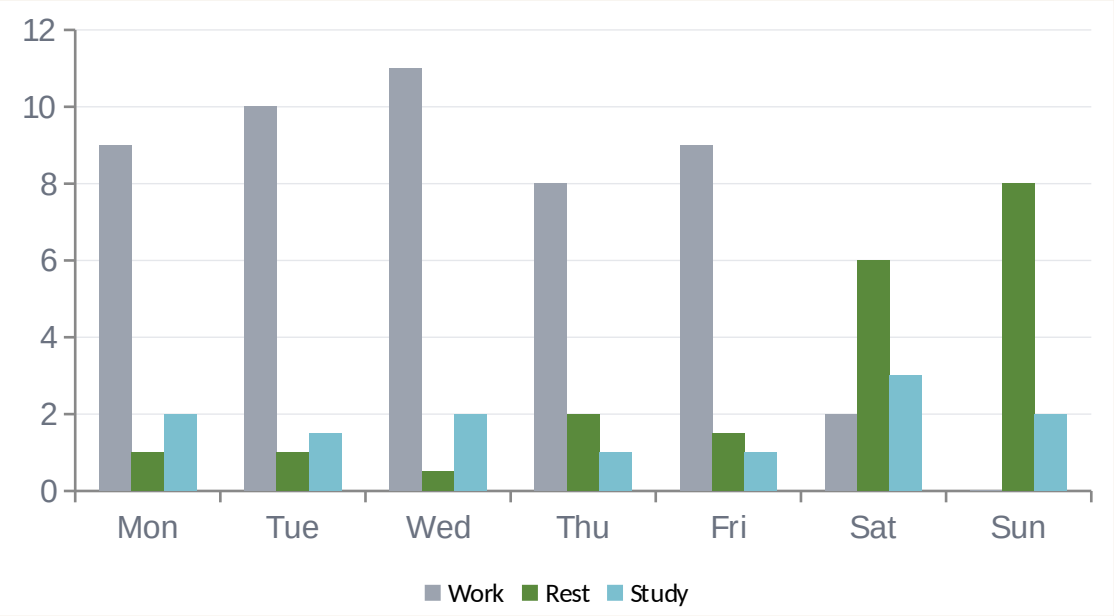

High Cholesterol
Gentle movement reminders, no high-intensity suggestions

Heart Condition
Calming content, meditation surfaced more often

Anxiety / Chronic Stress
Softer notifications, reduced frequency option, breathwork

How You've Been

Proactive burnout detection through weekly insights

! **Burnout Signal**

You worked 50+ hrs for 3 weeks straight

~ **Positive Trend**

Meditation streaks improved this week

◉ **Water Goal**

Hit daily target 5 of 7 days — great work

Auto-generated weekly insight shown below chart

How Root Works

Built with Flutter · Designed to be calming at every layer

01

Onboard

User sets profile, role, age, school status, sports, health conditions

02

Check In

GPS detects location or manual entry, UI theme instantly adapts

03

Monitor

App tracks time at location, sends gentle break & water nudges

04

Act

Meditation mode, break suggestions, water logging, all earn points

05

Review

Weekly analytics reveal patterns; auto-insights guide next week

Root
